

loll designs + cradle to cradle + LEED

Cradle to Cradle

The Cradle to Cradle Certified™ Product Standard guides designers and manufacturers through a continual improvement process that looks at a product through five quality categories — material health, material reutilization, renewable energy and carbon management, water stewardship, and social fairness. A product receives an achievement level in each category — Basic, Bronze, Silver, Gold, or Platinum — with the lowest achievement level representing the product’s overall mark.

Loll Certified Products

Upon completion of this certification 93% of Loll products became Cradle to Cradle® Certified, with 84% receiving an overall Cradle to Cradle Certified SILVER™ rating, and 9% receiving an overall Cradle to Cradle Certified BRONZE™ rating. The 7% that aren’t certified are within the accessory collection and contain materials besides the HDPE and richlite, but they will become certified in future assessments.

LEED

Sourcing of raw materials that contain recycled content allows for 1 LEED point to be achieved as our recycled post-consumer material exceeds the LEED certification criteria for MR credits 4.1 and 4.2. These credit checklists apply to: single family homes, residential complexes, hotels and resorts, retail outlets and more seeking LEED certification. For more information, please see - www.usgbc.org/credits

Additional LEED points can be attained for Loll’s Cradle to Cradle certified products, with BRONZE certified products adding 1 point, and SILVER certified products 2 points. For more information, please see - www.c2ccertified.org/get-certified/leed
